Immersive Worlds:
Applying Scenic Design
Techniques in 'Eurydice'
by Sarah Ruhl ✨

Presented by: Brynlee Beams

Presentation Overview ✨

- A About The Play
- B Reading the Play/Research
- C Ground Plan
- D Thumbnails
- E Perspective Drawing
- F Value Rendering/Color Rendering
- G Elevations/Model

About the play

Sarah Ruhl reimagines the story of Orpheus and Eurydice from the point of view of Eurydice herself. This play uses a less classical context and a new point of view to add fresh ideas to the original mythological tragedy while still holding true to the message of the original tale.

The story follows Eurydice, who dies on her wedding day. She finds herself in the underworld where she reunites with her father and goes on a journey to remember her lost love.

Beginning the Process

Meeting with the Director

The goal for the first meeting is to find a common method of approach which will be the glue that holds the visual elements together.

The director and designer will be in one long conversation until the opening of the production.

The First Read

The first reading of the script should be for the play's *content*.

The goal is to feel out the play's "emotional undercurrent" .

The Second Read

The second read-through is for the play's *intent*.

This reading is about personal discovery and playing with different ideas .

Research

Research is the longest and most ongoing part of the process, it typically extends through the whole of the project.

There are two main goals:

1. Understanding the context in which the characters live and the action of the show occurs.
2. Finding inspiration and evocative images

Orpheus and Eurydice

This play is based on a Greek myth about Orpheus, the son of a muse who falls in love with Eurydice.

Their happiness is short lived, the story ends in tragedy.

Auguste Rodin, Orpheus and Eurydice

Sarah Ruhl

Sarah Ruhl is an award-winning American playwright who has written many plays that have been produced on Broadway and both across America and internationally.

She wrote it for her father who was diagnosed with cancer and died two years after she turned 18.

In the interview Ruhl was asked about the significance of the use of string throughout the play (Orpheus' ring for Eurydice and her father's string room)

"The string is the umbilical cord, and it's the string of an instrument. It's also the idea of improvised care for others: If Orpheus can't afford gold, what does he have? He has a string, a more fragile tool. The father can't create a home out of bricks or straw, but maybe he has a bit of string. How can we show love and care for people with these very thin, tender, improvised objects?" (Schelling).

Unity Statement

To ACT in order to PURPOSE by means of AGENTS and AGENCIES in a time of SCENE.

To ORCHESTRATE in order to BOND by means of PERSISTENCE/PASSION and SURRENDER in a time
of PARALLEL SEPARATION.

Mood Board

A mood board, vision board, or concept collage is a physical or digital collection of ideas

It can include anything that helps define the direction you want to take with your project; this includes color palettes, textures, photos, illustrations and anything that sparks inspiration and ties in well with your concept.

Look for things to put in your board that evoke the theme, mood, and setting of your project and try to use your unity statement as well as any research you've done to influence your choices.
